

Willow Class Homework – Spring Term 2023

In **History** we are studying the Ancient Mayan civilization. The Mayans built major cities. Make a model of a Mayan castle, like the one pictured below.

In **Art**, we will be looking at contemporary work by Kazuhito Takadoi, Lauren DiCioccio and Karen Wyeth. They use natural materials, felt and fabrics with embroidery.

Start collecting natural materials - such as stones, twigs, leaves, or moss – or pieces of textile that you think would be effective in a piece of art.

Don't forget to read at home. It is really important, as it helps with understanding and fluency.

Reminder – there are spellings set each week on Spelling Shed (and on paper)

Also, keep working on your Tackling Tables sheet.

In **Science** we are exploring electrical circuits, including parallel and series circuits. Electricity is a vital part of all our lives.

Make a list of everything in your house that runs off electricity. Before you start, predict how many there will be.

Was your prediction accurate?
