## 1. Overview

At Blenheim Academy, the music curriculum has been designed as follows:

- The inter-related dimensions of music is an overarching strand that runs through our curriculum.
- To give pupils the understanding of how music is created through pitch, duration, dynamics, tempo, timbre, texture and structure and notation (inter-related dimensions of music) and to use this as a basis to develop their own compositions.
- The curriculum has been designed to enable pupils to feel that they are musical and to develop a life-long love of music.
- To expose pupils to music from all around the world and across generations, teaching children to respect and appreciate the music of all traditions and communities.

- There is a focus on developing the skills, knowledge and understanding that children need to become confident performers (singing and playing), composers, and listeners.
- Knowledge and skills is taught progressively to enable pupils to reach the end of key stage outcomes outlined in the National curriculum.

## 2. The organisation of the Music curriculum

The music curriculum is designed around 4 strands – performing, listening, composing and the history of music. The inter-related dimensions of music are woven through each strand:

The curriculum is based on a spiral curriculum model where previous skills and knowledge are returned to and built upon.

Our Progression of knowledge and skills (sections x to x) shows what is taught within each stage and how this is developed year on year to ensure the music attainment targets in the National Curriculum are securely met by the end of each key stage.

### 3. 2-year rolling programme

Performing, listening, composing, the history of music and the inter-related dimensions of music are taught through a theme approach. The themes taught are outlined below. To accommodate our mixed aged classes, the academy operates a 2-year rolling programme: -
